

SECULORE OVERWATCH™ CLOUD

EXPERT MANAGED CYBERSECURITY MONITORING IN THE CLOUD

Cloud and hybrid infrastructures demand a continuous, extensive cybersecurity threat detection solution. SecuLore meets this demand with a new approach to better visualize the threat landscape within the cloud by taking the patented Paladin™ cybersecurity monitoring technology and virtualizing it for cloud and hybrid network environments.

SecuLore OverWatch™ Cloud offers 24x7x365 comprehensive visualization and monitoring of cloud network activity with full forensic captures.

CLOUD CYBERSECURITY

BEHAVIOR BASED CYBERSECURITY

- SecuLore OverWatch™ Cloud offers next generation behavior based cybersecurity monitoring, customized specifically for cloud and hybrid critical infrastructure environments. It is specifically designed to identify threats often missed by other layers of cybersecurity.
- Utilizing our extensive experience identifying cyber attacks across the country, SecuLore's behavior based methodologies are continually updated to stay a step ahead of cyber threats.

PATENTED MONITORING TECHNOLOGY

- SecuLore's patented virtualized Paladin™ is at the heart of our cloud monitoring solution, integrating seamlessly with existing cybersecurity, cloud and hybrid network infrastructures.

COLLABORATIVE THREAT DETECTION

- SecuLore OverWatch™ Cloud includes dedicated SOC cyber-security experts who identify, and verify cyber threats, provide resources, and guidance on your behalf, and partner with your IT team to fortify your cyber posture.

Together We *CYBER-PROTECT* Our Nation's Critical Infrastructure

Why SecuLore OverWatch™ Cloud

- ✓ **Dedicated cyber analysts who know your network**
- ✓ **Cybersecurity monitoring and alert analysis 24x7x365**
- ✓ **Cybersecurity network activity reports**
 - Weekly in-depth customized report identifying vulnerabilities and remediation recommendations
- ✓ **Immediate notification of critical vulnerabilities**
- ✓ **Paladin support included**
- ✓ **Incident response**
- ✓ **Remote network traffic visualization and access to your network 24x7x365**
- ✓ **Capture and save suspicious data**

- ✓ **Enhance your IT resources**
 - Verify firewall configuration and security groups
 - Validate security protocols
 - Verify vendor network traffic
 - Validate compliance policy requirements
 - Identifies external and lateral traffic
 - Validate that “closed networks” are truly closed

YOUR TRUSTED CYBERSECURITY EXPERTS

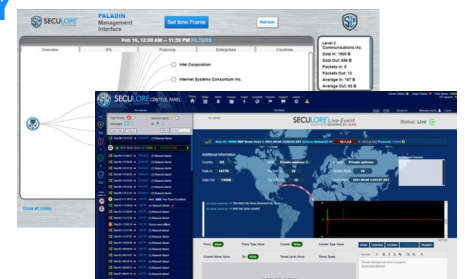

An innovator in public safety focused cybersecurity, SecuLore Solutions is passionate about protecting critical services from cyber criminals.

Led by trusted experts in public safety technology and cyber warfare, our team actively contributes to cybersecurity guidelines and policies for numerous formative organizations.

SecuLore has provided thought leadership, cybersecurity expertise, and subject matter insights for the Federal Communications Commission’s (FCC) Task Force for Optimal PSAP Architecture (TFOPA), NENA i3 Working Group, APCO Cybersecurity Training, CSRIC VII, CSRIC VIII, Maryland 911 Commission, the Maryland Sub-Committee for Cybersecurity and the iCert Board of Directors.
